

PRO-TEC® II

SYRINGE SHIELD

Replacing scratched or broken glass is simple.

White coated interior makes it easy to read syringe contents.

- ***Tungsten shielding***
- ***Lead glass window, easy to replace***
- ***Lightweight***
- ***Fits most disposable syringes***

The Pro-Tec® II Syringe Shield reduces hand exposure. It is designed for the clinician who has previously found it difficult to use conventional syringe shields. The Pro-Tec® II is thin, lightweight and easy to use.

The barrel of the shield is constructed of .06" (1.5 mm) thick tungsten that will reduce radiation exposure from Tc-99m by 94%. A 4.2 density lead glass window provides protection and visibility. The interior of the barrel behind the glass has a white coating that improves the view of the syringe and contents. A clip secures the lead glass to the tungsten barrel and makes it easy to replace scratched or broken glass. A stainless steel thumb screw holds syringes firmly in place.

Pro-Tec® II Syringe Shields accommodate the standard sized 1 cc to 10 cc syringes.

U.S. Patent #4,062,353

Pro-Tec® II Syringe Shields:

007-700 Syringe Shield, 1 cc	\$135.00
