

# XENON CONVENIENCE KITS

*Featuring the acclaimed SOFTSEAL mask, clear ultra-flex tubing which extends from 6" to 24" and mouthpiece kits with direct dose administration adapter for leak-proof xenon delivery.*

Biodex Xenon Convenience Kits bring together all the components needed to complete a single xenon study. Xenon can be administered via direct dose administration, that conveniently luer locks without the use of a needle; or by injection port, which requires a syringe needle. Xenon Convenience Kits can prolong the life of your xenon charcoal traps by ensuring that the pre-filled Drierite cartridges are fresh for every scan while the pre-filled Soda-Lime (CO<sub>2</sub> absorber) cartridges eliminate possible breakdown of granules that can lead to a clogged system and hinder patient air flow.
